

ENERGY EFFICIENCY CHECKLIST FOR MODERATE CLIMATES

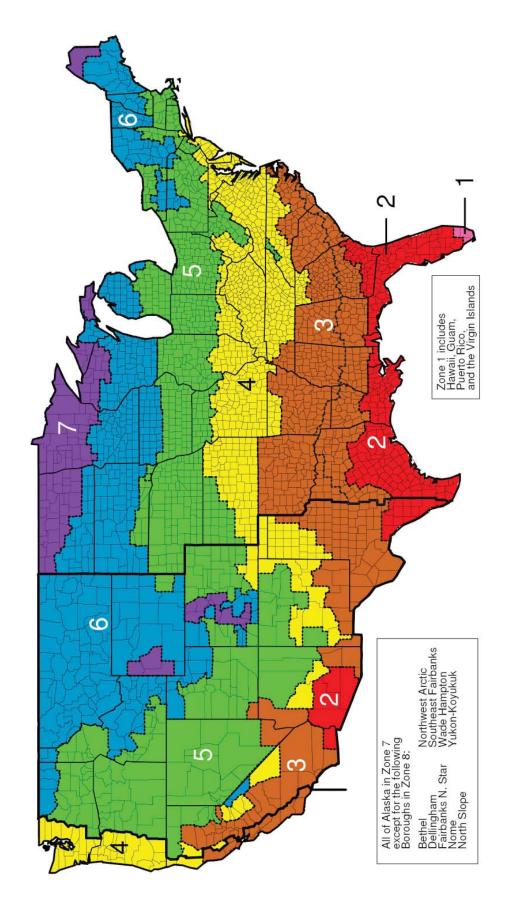

ZONES 4 AND 5

AIR LEAKAGE	☐ Seal ductwork in basements, attics, and crawl spaces with
☐ Caulk or foam penetrations to exterior, e.g., electrical	mastic or aluminum tape.
service, plumbing lines, telephone/TV cables, ductwork for vents and fans.	Insulate ductwork in uninsulated basements, attics, and crawl spaces.
☐ Caulk or foam penetrations to attic, basement, and garage,	☐ Install programmable thermostat.
e.g., electrical wiring and fixtures, plumbing supply and	If replacing furnace, boiler, or heat pump, install an
waste lines. Caulk sill plate and rim joist around perimeter of house.	ENERGY STAR® model.
☐ Weatherstrip/insulate attic and/or crawl space access	PLUMBING/WATER HEATER
panels.	Reduce water heater thermostat setting to 120°F or "Medium."
Install foam gaskets behind receptacle and switch cover plates.	☐ Install water heater insulation blanket.
☐ Install exterior air barrier/house wrap during extensive	☐ Flush water heater to remove sediment.
siding replacement or install 3/4" layer of rigid foam	☐ Install pipe insulation on hot and cold lines within 5' of water heater.
insulation and tape seams for extra thermal advantage. □ Ensure fireplace damper and/or doors operate properly.	☐ Install pipe insulation on all hot water pipes in basement or
WINDOWS	crawl space.
Replace broken or missing window panes.	 ☐ Replace washers on leaky bath and kitchen sink faucets. ☐ Install low-flow aerators on bath and kitchen sink faucets.
Replace locking hardware if missing or damaged.	☐ Install low-flow showerheads.
Reglaze windows.	Reduce volume of water in older toilet tanks.
☐ Caulk around exterior frame/interior trim.☐ Weatherstrip sashes.	☐ If replacing water heater, install energy efficient model. (Energy Factors: Gas >0.60, Electric >0.93.)
Repaint exterior wood frames and sashes.	LIGHTING/APPLIANCES
Install exterior/interior storm.	☐ Install compact fluorescent bulbs in high-use areas, e.g.,
☐ Install Low-e replacement windows.(U-value < 0.45 SHGC < 0.45)	kitchen, living area, entryway, porch.
DOORS	☐ Install light-/motion-sensitive fixture on main entrance light
DOORS Replace/adjust locksets on exterior doors and doors to	fixture and spots.
☐ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement,	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured
 Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990.
 Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. Caulk around exterior door frames; reglaze as needed. 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990. (ENERGY STAR models will be the most efficient.)
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. □ Install storm door(s). 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990. (ENERGY STAR models will be the most efficient.) Clean/replace dryer, range hood, bath fan vents with
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990. (ENERGY STAR models will be the most efficient.) Clean/replace dryer, range hood, bath fan vents with dampered vents. MOISTURE CONTROL Replace fixed crawl space vents with operable vents that
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. □ Install storm door(s). □ Replace exterior door(s) – steel with polyurethane foam core. 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990. (ENERGY STAR models will be the most efficient.) Clean/replace dryer, range hood, bath fan vents with dampered vents. MOISTURE CONTROL Replace fixed crawl space vents with operable vents that can be closed during hot, humid and/or cold periods.
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. □ Install storm door(s). □ Replace exterior door(s) – steel with polyurethane foam 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990. (ENERGY STAR models will be the most efficient.) Clean/replace dryer, range hood, bath fan vents with dampered vents. MOISTURE CONTROL Replace fixed crawl space vents with operable vents that
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. □ Install storm door(s). □ Replace exterior door(s) – steel with polyurethane foam core. INSULATION □ Insulate attic to at least R-38. (Make sure that soffit vents are not blocked and that 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990. (ENERGY STAR models will be the most efficient.) Clean/replace dryer, range hood, bath fan vents with dampered vents. MOISTURE CONTROL Replace fixed crawl space vents with operable vents that can be closed during hot, humid and/or cold periods. Install 6-mil (or heavier) poly on dirt crawl space floors and seal to foundation walls with caulk. Do not install vapor barriers such as vinyl wallpaper or poly
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. □ Install storm door(s). □ Replace exterior door(s) – steel with polyurethane foam core. INSULATION □ Insulate attic to at least R-38. (Make sure that soffit vents are not blocked and that insulation does not contact roof sheathing.) 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990. (ENERGY STAR models will be the most efficient.) Clean/replace dryer, range hood, bath fan vents with dampered vents. MOISTURE CONTROL Replace fixed crawl space vents with operable vents that can be closed during hot, humid and/or cold periods. Install 6-mil (or heavier) poly on dirt crawl space floors and seal to foundation walls with caulk. Do not install vapor barriers such as vinyl wallpaper or poly on interior of exterior walls.
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. □ Install storm door(s). □ Replace exterior door(s) – steel with polyurethane foam core. INSULATION □ Insulate attic to at least R-38. (Make sure that soffit vents are not blocked and that insulation does not contact roof sheathing.) □ Insulate floor above unconditioned basement, crawl space, or garage with heated room above to R-30. 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990. (ENERGY STAR models will be the most efficient.) Clean/replace dryer, range hood, bath fan vents with dampered vents. MOISTURE CONTROL Replace fixed crawl space vents with operable vents that can be closed during hot, humid and/or cold periods. Install 6-mil (or heavier) poly on dirt crawl space floors and seal to foundation walls with caulk. Do not install vapor barriers such as vinyl wallpaper or poly on interior of exterior walls. Rake soil away from exterior of foundation if it is closer than 6" from wood framing or siding.
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. □ Install storm door(s). □ Replace exterior door(s) – steel with polyurethane foam core. INSULATION □ Insulate attic to at least R-38. (Make sure that soffit vents are not blocked and that insulation does not contact roof sheathing.) □ Insulate floor above unconditioned basement, crawl space, or garage with heated room above to R-30. □ Insulate exterior walls (R-13 to R-19 when practical) or blow 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990. (ENERGY STAR models will be the most efficient.) Clean/replace dryer, range hood, bath fan vents with dampered vents. MOISTURE CONTROL Replace fixed crawl space vents with operable vents that can be closed during hot, humid and/or cold periods. Install 6-mil (or heavier) poly on dirt crawl space floors and seal to foundation walls with caulk. Do not install vapor barriers such as vinyl wallpaper or poly on interior of exterior walls. Rake soil away from exterior of foundation if it is closer than 6" from wood framing or siding. Ensure grade slopes away from the house at a 5% slope.
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. □ Install storm door(s). □ Replace exterior door(s) – steel with polyurethane foam core. INSULATION □ Insulate attic to at least R-38. (Make sure that soffit vents are not blocked and that insulation does not contact roof sheathing.) □ Insulate floor above unconditioned basement, crawl space, or garage with heated room above to R-30. □ Insulate exterior walls (R-13 to R-19 when practical) or blow insulation into wall cavities from interior or exterior. 	fixture and spots. Vacuum refrigerator coils and clean fan grill. Consider replacing refrigerator if it was manufactured before 1990. (ENERGY STAR models will be the most efficient.) Clean/replace dryer, range hood, bath fan vents with dampered vents. MOISTURE CONTROL Replace fixed crawl space vents with operable vents that can be closed during hot, humid and/or cold periods. Install 6-mil (or heavier) poly on dirt crawl space floors and seal to foundation walls with caulk. Do not install vapor barriers such as vinyl wallpaper or poly on interior of exterior walls. Rake soil away from exterior of foundation if it is closer than 6" from wood framing or siding. Ensure grade slopes away from the house at a 5% slope. Install gutters and downspouts, especially in regions
 □ Replace/adjust locksets on exterior doors and doors to unconditioned spaces, e.g., outdoors, attic, basement, garage to ensure doors close tightly. □ Caulk around exterior door frames; reglaze as needed. □ Replace weatherstripping and install door sweeps on exterior doors or doors that adjoin unconditioned spaces. □ Install storm door(s). □ Replace exterior door(s) – steel with polyurethane foam core.
